

TASK 22

CALCULATOR APPLICATION PUSH TO DOCKER IMAGE

1) Pull the docker images and run them:

```
Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\Users\Akarshana> docker pull kishore0987/simple-calci
Using default tag: latest
latest: Pulling from kishore0987/simple-calci
371636d7f412: Pull complete
db53381ee51f: Pull complete
c83419f44309: Pull complete
0b22ec2d9b1a: Pull complete

Digest: sha256:e0e4b9d33569aea42911b2030812b5397c44194ec3e4f566e127a940d7ad9582
Status: Downloaded newer image for kishore0987/simple-calci:latest
docker.io/kishore0987/simple-calci:latest

What's next:
  View a summary of image vulnerabilities and recommendations → docker scout quickview kishore0987/simple-calci
PS C:\Users\Akarshana> docker images
```

IMAGE	ID	DISK USAGE	Info →	In Use
kishore0987/simple-calci:latest	e0e4b9d33569	1.58GB	CONTENT SIZE	EXTRA

2) Running the docker images:

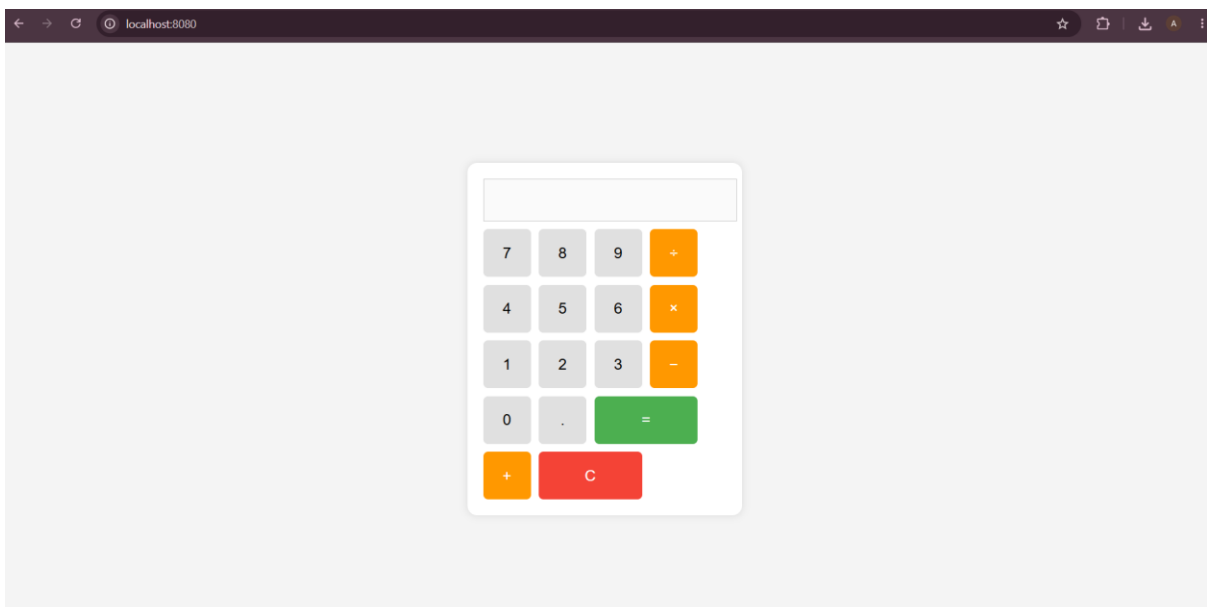

```
PS C:\Users\Akarshana> docker images
```

IMAGE	ID	DISK USAGE	Info →	In Use
kishore0987/simple-calci:latest	e0e4b9d33569	1.58GB	CONTENT SIZE	EXTRA

```
PS C:\Users\Akarshana> docker run -d -p 8080:80 kishore0987/simple-calci
c329e8642cef8c191e3ffbd58daf07019166f7358935af57691108b31ff95bbe
PS C:\Users\Akarshana> docker ps
```

CONTAINER ID	IMAGE	COMMAND	CREATED	STATUS	PORTS	NAMES
c329e8642cef	kishore0987/simple-calci	"docker-entrypoint.s..."	16 seconds ago	Up 15 seconds	0.0.0.0:8080->80/tcp, [::]:8080->80/tcp	pedantic_mccarthy

3) Visiting the docker image through localhost:8000 :

4) Push the image into the docker:

```
C:\Users\Akarshana>docker login
Authenticating with existing credentials... [Username: akarshanas]

Info → To login with a different account, run 'docker logout' followed by 'docker login'

Login Succeeded

C:\Users\Akarshana>docker tag kishore0987/simple-calci akarshanas/simple-calci

C:\Users\Akarshana>docker push akarshanas/simple-calci
Using default tag: latest
The push refers to repository [docker.io/akarshanas/simple-calci]

C:\Users\Akarshana>
```

5) Check whether the image is pushed into docker hub:

The screenshot shows the Docker Desktop application window. The left sidebar contains navigation options: Gordon, Containers, Images, Logs, Volumes, Kubernetes, Builds, Models, Docker Hub, MCP Toolkit (BETA), and Extensions. The main panel displays the 'Containers' section with a search bar and a toggle for 'Only show running containers'. Below this is a table of containers:

	Name	Container ID	Image	Port(s)	CPU (%)	Last started	Actions
☐	tender_goodall	f0c11ca8f37b	kishore0987/simple-calci	8080:5000	0%		
☐	pedantic_mccarthy	c329e8642cef	kishore0987/simple-calci	8080:80	0%	5 hours ago	
☒	beautiful_ramanujan	d1bfea26fbfe	kishore0987/simple-calci	8080:5000	0%	12 minutes ago	

Below the table, it says 'Showing 3 items'. There are also 'Walkthroughs' for 'Multi-container applications' (8 mins) and 'Containerize your application' (3 mins). The bottom status bar shows 'Engine running', 'RAM 0.92 GB', 'CPU 1.41%', 'Disk 2.98 GB used (limit 1006.85 GB)', and a 'Terminal' icon.
